About Me

Full-Stack Software Developer focused on architecting and building solid, efficient, and scalable solutions. Driven by an analytical mindset, complex problem-solving, and continuous technical learning. I enjoy contributing to open-source initiatives, exploring development tools, and building personal projects that optimize workflows and create real impact.

Interests

- Sports & Discipline:** I practice rock climbing, swimming, and fitness training—activities that strengthen my discipline, patience, and focus.
- Music:** I play the piano, a discipline I enjoy as a creative outlet and a way to maintain mental balance.

WORK EXPERIENCE

Full-Stack Developer: Tight Line(Startup) Dec-2024 - Present

Achievements:

- Improved operational efficiency by 35% by automating ETL workflows, accelerating processes through AI-powered tools.
- Increased scalability by structuring backend logic into high-performance, modular services.
- Optimized database integrity by resolving record inconsistencies leveraging AI models.

Key Responsibilities:

- Resolved incidents in production environments, leveraging AI to accelerate troubleshooting and bug fixes.
- Developed and integrated scalable APIs alongside responsive, reusable web interfaces.
- Executed data transformation and integration processes with third-party services.
- Documented system architecture, business rules, and data models, utilizing AI to streamline technical documentation.
- Ensured software and data quality by automating testing and continuous deployment pipelines.

Tools: TypeScript, JavaScript, Node.js, NestJS, React.js, Next.js, AWS, Claude, SQL, PostgreSQL, Prisma ORM, Jest, Playwright, Docker, GraphQL, CI/CD.

Full-Stack Developer: Theodo UK Jun-2021 – Nov-2024

Accomplishments:

- Increased data security by automating backups and updates.
- Optimized operations by automating manual back-office processes.
- Reduced reporting time from 3 days to hours by automating data collection.

Key Responsibilities:

- Fixed bugs and troubleshoot issues.
- Designed views and stored procedures.
- Resolved bugs and ensured integrity between databases.
- Managed infrastructure and deployments on AWS.
- Created technical documentation and runbooks.
- Automated manual processes.

Tools: TypeScript, Javascript, Python, Node.js, NestJS, React.js, AWS, SQL, PostgreSQL, Prisma ORM, Jest, Playwright, Docker, Bash, TensorFlow, Keras , CI/CD.

EDUCATION

University of London (UOL) 2021 – 2024

Bachelor of Computer Science - Graduated

LANGUAGES

- English — Advanced proficiency (C1)
- Spanish — Native proficiency
